Addressing personal data protection

Project acronym: BIGPROD

Grant Agreement no: 870822

Deliverable: D7

Deliverable Information	This is a public section of the projects description of Platform high-level architecture and data flows: the deliverable describes the high-level architecture of the platform, its functional areas, and the data flows it implements
Deliverable number and name:	D7 Personal Data Protection Strategy and Measures
Due date:	31st May 2020
Delivery:	
Work Package:	WP3
Lead Partner for the Delioverable:	PPMI
Author:	Lukas Pukelis
Reviewers:	Arho Suominen
Approved by:	Arho Suominen, Scott Cunningham & Hugo Hollanders
Dissemination level:	Confidential
Version:	21st May 2020

5.2.2019

Measures to Ensure Personal Data Protection and GDPR Compliance

We will closely follow the measures outlined in the project Data Management Plan (D33) and Personal Data Protection strategy (D7 and D10) to ensure data protection and GDPR compliance. The key points underpinning our actions are:

- We are collecting data from the web and integrating data from various sources for the purposes of scientific research.

- We do not intentionally or specifically collect any personal or sensitive data. We do not seek to identify or target individuals in this project.

- Some personal data from the public domain will be collected during the project as a part of the general data collection effort – inventor names from patents or person names from company websites. However, we take measures to minimize the collection of such data. We do not include such data in indicator construction. We do not circulate such data within the consortium.

- We employ the platform design, which separates the platform into three functional areas and strictly specify what data can be passed between the areas. In such way we ensure that the data security and prevent possible data breaches.
